

CITY MANAGERS REPORT
Report Period May 8, 2019 – June 5, 2019

Ginger Allen, City Manager

Scio Community Clean-up Days Update:

Scio Clean-up Day was a huge success. It was a great experience working with the Scio High School and S.C.I.O. Beautification Committee. Several citizens turned out to assist with the city wide clean-up efforts and I have received nothing but positive reports back from local business people and citizens alike.

Sewer Emergency Avoided:

On May 29, 2019, while doing morning rounds, our Public Works staff found that our sewer system was plugged and that the pipes were filling up very quickly. No residence or business suffered any back up inside their buildings. Fortunately, the City of Lebanon assisted us with a two man crew and their Vactor truck, along with Iceland Vactor Service and A&B Septic all came to our assistance and avoided an raw sewage/overflow emergency.
